

CONFIGURE YOUR COMPUTER FOR PARAGON

Paragon is designed to work with Internet Explorer 6.0 or higher. It may work with other browsers, but you will not get full functionality of the program, and we cannot support or troubleshoot in any other browser. Due to changes in Microsoft's support policy, Fidelity MLS Systems and Solutions will no longer support Windows 95, Windows 98, Windows 98 Second Edition and Windows Millennium (ME) operating systems using the Paragon 3 MLS system. For a full list of recommended PC configurations, please see our member website at www.scwmls.com under Paragon Info.

To manually configure the settings on your computer, please see the document located in Paragon under MLS DOCS>IE 6 SETTINGS FOR PARAGON.

To automatically configure the settings on your computer, follow the steps below:

1. Go to the Login page of Paragon, but do not enter your user name and password.
2. Click on the button that says "System Checker".
3. If you know what version of Windows you are using, click on the appropriate link. If you do not, click on the "Help" button.
4. You will be taken to the Fidelity website. There is a picture of a woman working on a laptop. To the lower right-hand corner of the picture, click DOWNLOAD.
5. You will be prompted with the question, "Do you want to run or save this file?". Click on RUN.
6. Next, it will ask you, "The publisher could not be verified. Are you sure you want to run this software?" Click on RUN.
7. On the Paragon System Setup Utility window, you will be asked to "Select your Board and then press OK." It is very important that you choose **South Central Wisconsin Madison**. Then click OK.
8. You will be asked to verify that you have selected South Central Wisconsin Madison. Click OK.
9. On the next Paragon System Setup Utility Window, click RUN. This may take a minute or two, as your computer is being configured for Paragon.
10. When it is done, you will be asked, "Would you like to clear your temporary internet files?" Click YES.
11. When finished, you will see a message that says, "All temporary internet files have been cleared. Press OK to continue." Click the OK button.
12. Answer yes to reboot your computer. When it comes back up, you should now be able to click on the icon on your desktop for Paragon, log in and begin to use the MLS!

If you receive an error message while trying to configure your PC for Paragon, please call the South Central MLS at (608)240-2800 or (800)422-8831. If you need anything else, please email us at support@wisre.com, or call the office during regular business hours and Jen, Rick, or Patty can help you.
