

MLS Listings on the Go

Paragon Mobile

Paragon Mobile allows real-time access to Paragon MLS from any browser-enabled device, such as a Blackberry, Treo, iPhone, or PDA.

Paragon Mobile is not a substitute for the online Paragon system, but rather a companion product that will allow mobile users the ability to:

- >Perform property searches using 25+ search fields.
- >Display 40+ property characteristics, up to 6 property photos, and map location for MLS active and off market listings.
- > Perform office and agent searches with one-step click to dial.
- >Easily email MLS listings.

If you have access to the Internet from your mobile device, there is no additional cost. Go to <http://scwmls.mobile.paragonrels.com> and use the same login name and password you use to access Paragon.
