

System Recommendations

The following operating systems and browsers have been tested and are recommended for use with version 3.0 of reInsight Mobile. LPS Real Estate Group (LPSREG) shall not be responsible for system performance or reliability when using an operating system or browser that is not included in the recommended list as specified below.

Operating Systems	Browsers
Android OS	Android
Apple iOS	Safari
Symbian OS	Polaris
RIM Blackberry	Blackberry
	Blazer
	Firefox Mobile
	Dolphin
	Opera Mobile

1. Although reInsight Mobile may work on operating systems and browsers that are not listed, LPSREG will only provide support for those listed in this document.
2. Although reInsight Mobile may work on mobile devices older than 24 months, LPSREG does not support its use on devices older than 24 months.

Mobile devices and their operating systems evolve rapidly and new features may not be supported in reInsight Mobile immediately. Many browsers are also “stripped down” versions of the browser you may use on your laptop or desktop computer. As such, not every feature of the browser may be supported on the mobile device. LPSREG has endeavored to provide the most feature-rich application utilizing the broadest range of available features.

LPSREG will make a continuous effort to stay current and maintain compatibility with multiple operating systems and browsers. When a new version of a supported operating system or browser is released it may not be supported immediately due to the possible changes that are made during a browser’s beta release. Testing and code changes to reInsight Mobile will not be made until after the new version has been officially released. We estimate that we will be compatible and able to support the newer versions within 6 months after official Gold release. Also note that new operating system and browser versions sometimes represent major changes, and in these cases additional testing and development time may be required to reach compatibility.

Adding additional operating systems and browsers to our supported list will be based on market analysis and overall needs of our user base. Once a new operating system or browser has been added to our supported browser list we will make an effort to communicate to our clients in a timely manner. Communication will be distributed by our System Support Managers and the updates to this document will be posted to our Administrative SharePoint site.
