Setting up Showing Activity

Each time a key container is opened on a keybox, the key records the showing information and sends it to the Supra network. To view showing information, the keyboxes placed on your listings first need to be in your keybox inventory. You can manage your keybox inventory at the Supra website. Once your keyboxes are in your keybox inventory, you can view the last six months of showing information for those keyboxes at SupraWEB.

Managing Listings and KeyBox Inventory at SupraWEB
1. From SupraWEB select the LISTINGS menu option.
2. Select the Keyboxes link to view a list of keyboxes in your inventory.
3. To add a keybox, select the Add KeyBox link and enter the keybox serial number, shackle code, and the MLS number where the box is located.
4. To assign a listing to a keybox already in your inventory, select the Assign Listing dropdown, choose the keybox and enter the MLS number where the keybox is located.
Be sure to update the listing ID when you place a keybox on a new listing, so the address information shows correctly on reports.

Setting up Email Settings

You can have the system send you an email when someone opens one of your keyboxes or sends you showing feedback.
1. From SupraWEB select SETTINGS.
2. Select **General Email**.

3. Enter your email address.

4. Check each type of notice you want to receive and enter any additional email addresses you would like the email notice sent to.

5. In the  **Personalized Signature Image** section, click **Browse** and select a picture you would like shown on emails and reports.

6. Fill out your contact information in **Personalized Signature Text** to have your contact information display on emails and reports.

Once one of your listings has been shown and the showing information is sent to the network, you'll receive an email.
